Yuxin Sun

971-997-3763 sunyux411@gmail.com https://sunyux.github.io/MockYX/

EDUCATION

Oregon State University, Corvallis, Oregon **Sep 2023 – Dec 2025**
Master of Engineering in Computer Science
Portland State University, Portland, Oregon **Sep 2019 – Mar 2023**
Bachelor of Science in Computer Science

WORK EXPERIENCE

The Ladies Club **Jul 2025 - Now**
Web Assistant

- Built and maintained the organization's website using Google Sites and WordPress, implementing interactive features and dynamic functionality using PHP and JavaScript, ensuring smooth navigation and responsive design.
- Migrated the site from Google Sites to WordPress, enhancing maintainability, user experience, and backend functionality.
- Updated pages dynamically, optimized layouts for accessibility, and integrated interactive elements using custom scripts and PHP modules.
- Designed interactive, editable pages and dashboards to enable easy access and engagement for users without technical expertise.

Oregon State University Global Opportunities **Jul 2024 – Dec 2025**
Peer Advisor

- Advised students on international programs, connecting them with resources and technical tools for program management.
- Designed and maintained interactive dashboards and program pages using Drupal/WordPress and Canvas.
- Built and maintained the website on Drupal/WordPress and created course content on Canvas.

Oregon State University Food Innovation Center **Jan 2025 – Dec 2025**
Sensory Technician

- Assisted Sensory Program staff with participant scheduling, confirmation emails.
- Utilized Microsoft Mail and Access to support program operations.

Oregon Research & Teaching Security Operations Center **Jan 2024 – Mar 2024**
Volunteer

- Monitored and investigated suspicious logs and alerts, updating tickets with detailed analysis.
- Developed rules and exceptions to reduce false positives in security monitoring.
- Conducted penetration testing and created detailed technical reports to communicate findings effectively.

RECENT PROJECTS

Oregon's Hazards: Analyzing Wildfire and Landslide with Population May 2025 - June2025

- Used hexagonal binning to map hazards without spatial bias.
- Created immersive visualizations that highlight risk changes, demonstrating strong skills in 3D modeling and data-driven insights.

Available Aid **Jul 2022 - Dec 2022**

- Developed a full-stack web app connecting homeless individuals with shelters using Node.js, Laravel, React, and containerized deployment via Docker.
- Implemented Agile development methodologies for project planning, task prioritization, and iterative releases.

SKILLS

Languages: TypeScript, JavaScript, C++, Python, Java, HTML/CSS, SQL, PHP, C#
Frameworks & Tools: React, React Native, Node.js, Laravel, Docker, Git, MongoDB, MySQL, Pytorch, Tailwind CSS, Three.js, Blender, Figma, Adobe Photoshop
Cloud & Server: Google Cloud, containerized deployment, basic Kubernetes concepts
Other: 3D module development, data visualization, telemetry pipelines, testing & maintainable code practices, Agile (Scrum, SAFe)
